50X1-HUM

50X1-HUM

The following reports of observations in the Baltic Sea and at Ventspils and Klaipeda

Attachment No.

Subject

50X1-HUM

1

A four-page report on naval vessel sightings and radar installation observations made in Ventspils

Vessel sightings included 17 KRONSTADT-class submarine chasers,

three motor torpedo boats,

six SASHA-class minesweepers, one 50X1-HUM T-43 minesweeper; two tenders and

an old vessel, an old trawler, an ex-MARTI-class minelayer. Also reported is a description of the harbor radar tower and scanner.

2

A one-page report on naval vessel sightings at Klaipeda including: one submarine,

two identical vessels resembling motor torpedo boats

two identical vessels resembling motor torpedo boats

3

A three-page report on naval vessel sightings and other observations at Ventspils

Vessel sightings included 17 KRONSTADT-class submarine chasers.

two SASHA-class minesweepers, two T-43-class

3

minesweepers [redacted] four tenders, [redacted] LOTS 54. The report includes information on: planned construction of four piers in the new oil harbor to handle nine million tons of oil annually; planned construction of three piers in the Outer Harbor and an additional breakwater beyond these piers; and a new quay which was under construction.

50X1-HUM

4

A one-page report on naval vessel sightings at Ventspils including: seven KRONSTADT-class submarine chasers [redacted] three unidentified vessels, including an old trawler [redacted] five small patrol boats [redacted] and four [redacted] one minesweeper [redacted] and the icebreaker KAPITAN VORONIN.

50X1-HUM

50X1-HUM

5

A one-page report on naval vessel sightings in the Baltic Sea [redacted] including: a Soviet naval vessel [redacted] a Soviet naval vessel, believed to be a RIGA-class destroyer, at N 55-30, E 19-50. Radio messages among vessels indicated great Soviet naval activity close to shore [redacted]

50X1-HUM

50X1-HUM

6

A two-page report on naval vessel sightings, control measures, and other observations made in Vainpida [redacted] Vessels sightings included: submarines, [redacted] [redacted]; three Q-class submarines [redacted] one RIGA-class destroyer and one unidentified two-funnel destroyer near N 55-32, E 20-05; the merchant vessel KALUGA. Three 80 to 100-millimeter guns were observed near the lighthouse, and three large cylindrical tanks were observed floating in the moat at the Citadel. There was no inspection of vessels on arrival, but there was a thorough search before departure. On 8 January only four crew members were permitted shore leave, and on 18 January special permission for shore leave up to midnight was required for the crew, with future privileges withheld for violations.

50X1-HUM

50X1-HUM

7

A two-page report on naval vessel sightings in Ventspils including: a tanker [redacted] fourteen KRONSTADT-class submarine chasers, [redacted] a POLUKHIN-class target-towing vessel [redacted] ten 20-meter wooden motorboats, [redacted] six probable SASHA-class minesweepers. A sketch of the tanker, [redacted] is attached.

SOURCE EVALUATIONS ARE DEFINITIVE. APPRAISAL OF CONTENT IS TENTATIVE. NOTE FOREGOING EXPLANATION.

1. The below listed Soviet naval vessels were observed at the Naval Quay in Ventspils [REDACTED]

50X1-HUM

Subchasers

50X1-HUM

- a. KRONSHADT-class subchasers, flying the naval flag [REDACTED]

- b. Six KRONSHADT-class subchasers [REDACTED]

[REDACTED] was of the same size as the other KRONSHADT-class subchasers, but it appeared older, had a slightly different

S-E-C-R-E-T

50X1-HUM

S-E-C-R-E-T

50X1-HUM

50X1-HUM

- 2 -

bridge, and a radar tower instead of a mast. The radar scanner on No. 738 appeared to be about twice as large as the scanners on the other KRONSHADT-class submarines.

Motor Torpedo Boats

50X1-HUM

- c. Two motor torpedo boats without tubes were observed flying a green flag [redacted]

Minesweepers

50X1-HUM

- d. Six SASHA-class inshore minesweepers, flying the naval flag, [redacted]

[redacted] The funnels of the minesweepers bore a wide green band with a narrower white band above and below the green band.

50X1-HUM

- e. Six or seven minesweepers [redacted] but whose funnels bore a white/blue/white band were observed [redacted]

50X1-HUM

- f. One T-43-class fleet minesweeper was observed [redacted]

- g. A large minesweeper with a blue/white/blue band around the funnel [redacted]

50X1-HUM

- h. One minesweeper, larger than the minesweepers usually observed in Ventspils, arrived during the night [redacted] The vessel was about 50 meters long and had a foremast, one mast, and one funnel with a white/green/white band.

50X1-HUM

Minesweepers and Other Small Vessels

- i. Six to eight small vessels with canvas around the bridge were observed in the upper reaches of the harbor, and six small minesweepers were observed closer to the harbor entrance [redacted]

50X1-HUM

- j. Six small naval vessels resembling patrol boats were observed inside the harbor at the end of the Naval Quay [redacted]

Tenders

50X1-HUM

50X1-HUM

50X1-HUM

- k. [redacted] which had an aluminum-colored funnel, arrived [redacted] A tender [redacted] which had an aluminum-colored funnel with a black top, two masts, a high foremast which extended to the bridge house, a heavy-duty derrick on the aft mast, and a towing winch on the quarter-deck, was observed [redacted]

50X1-HUM

- l. Tender, [redacted] believed to be an [redacted] vessel, arrived during the night [redacted] Tender, [redacted] an old vessel resembling a trawler, which had an aluminum-colored funnel, was observed [redacted]

50X1-HUM

50X1-HUM

- 3 -

50X1-HUM

- m. A tender, probably an [ ] vessel, with an aluminum-colored funnel and with two or three lightbuoys on deck, entered the harbor [ ] 50X1-HUM
- n. An ex-MARTII-class fleet minelayer with the name on the stern painted over was observed [ ] Smoke was seen rising from one of the funnels [ ] and many crew members were observed aboard. 50X1-HUM
- o. One large vessel with two funnels and gun mounts on the fore-deck and the quarter-deck was observed [ ] The vessel's name or number was not observed.<sup>9</sup> 50X1-HUM
- p. An old vessel flying a blue flag and with a clipper stem and two funnels was observed [ ] 50X1-HUM
- q. An old vessel, [ ], flying a blue flag, was unloading chocks /or cleats/ with an electric crane [ ] The chocks were the type used in setting ashore small vessels, bedboards, blankets, etc. The vessel left the harbor on the afternoon [ ] 50X1-HUM
- r. A salvage vessel, flying the naval flag, and a blue motorboat were observed [ ] 50X1-HUM
- s. A lighter was observed [ ]
- t. An old trawler, [ ] flying a green flag, was observed on [ ] 50X1-HUM
2. A square box was observed on the seaward-pointing arm of the harbor radar tower [ ] The box was slightly higher than the radar scanner, and both the box and the radar scanner made one revolution in every 10 seconds. The largest dimension of the box was five to six times smaller than the scanner's largest dimension. The box was estimated to be one-half meter in height.<sup>10</sup> 50X1-HUM
3. [ ] the harbor radar scanner was observed and described as being situated on a base between the two arms of a steel girder tower. One of the tower's arms pointed out to sea and the other pointed in the opposite direction. On each of the arms was a platform positioned slightly higher than the radar scanner. On the arm pointing out to sea was a square box with three small, thick, vertical rods. This box with vertical rods revolved in time with the radar scanner at the rate of five to six revolutions per minute. A short antenna and several whip antennas were on the other arm of the tower.<sup>11</sup> 50X1-HUM

- 2 -

50X1-HUM

50X1-HUM

they were believed to be KRONSTADT-class subchasers, but they had a girder mast with radar instead of the usual mast.

- c. SASHA-class inshore minesweepers flying the naval flag

50X1-HUM

- d. T-43-class fleet minesweeper

One T-43-class minesweeper

- e. Six minesweepers were observed

Five minesweepers, presumably of the SASHA class,

50X1-HUM

- f.

50X1-HUM

- g. Two tugboats were observed The naval tanker, left the harbor

- h. Twelve motor torpedo boats were ashore Nine vessels, which were the size of motor torpedo boats and which had antiaircraft artillery but no torpedo tubes, were observed

50X1-HUM

- i. Two unidentified vessels were observed

50X1-HUM

- j. The ex-MARTI-class fleet minelayer was observed

it had been named ELISABETH, but that this name had been painted over. When the ex-MARTI vessel was observed at the Naval Quay, she had no radio or radar antennas, and the guns had been removed with only the empty gun mounts remaining. Smoke rose from the aftermost funnel, but the foremost funnel was covered. The vessel was poorly maintained. Many patches which resembled repairs made after shelling were welded on the port side. Several people in white fatigue dress, probably galley personnel, were seen on deck. Two or three groups of 30 to 40 sailors each were engaged in close order drills and practicing the goose-step all day long on the quay in front of the vessel.

50X1-HUM

- k. A fire-fighting vessel, which previously had been gray, was observed to have been painted black.

50X1-HUM

S-E-C-R-E-T

50X1-HUM

Attachment #3

S-E-C-R-E-T

50X1-HUM

- 3 -

50X1-HUM

1. Two vessels, [redacted] were observed [redacted]. The vessels were slightly smaller than KRONSTADT-class subchasers and had a high stem, a flat stern, apparently two screws, and no funnel. 50X1-HUM 50X1-HUM

2. The following information about the new oil harbor in Ventspils was provided:

- a. [redacted] four piers were to be constructed. The depth in the entrance and at the piers was to be 12.5 meters, and this new facility would be able to accommodate tankers of 15,000 to 20,000 dwt and 9 million tons of oil annually. [redacted] the oil would be piped to Ventspils from the interior of the Soviet Union, and that large oil tanks were under construction or completed 3 kilometers inland from Ventspils. 50X1-HUM
- b. [redacted] three piers were to be built in the Outer Harbor, and that construction was in progress on the middle pier. An additional breakwater was to be built beyond the piers. The depth of the water at the piers was to be 10 meters. 50X1-HUM
- c. It was observed [redacted] that work was in progress in the Outer Harbor on a new pier which appeared to be the middle one of three piers. The new pier was approximately 150 meters long and 25 meters wide. Both sides of the pier were of interlocking steel sheet piling and sand was apparently being filled in between the two sides. The sand was apparently obtained from large excavations in the area where the new pier abutted the beach. A lighter with sand, a floating crane, and a pile driver were moored at the pier. 50X1-HUM
- d. [redacted] a new quay was observed under construction between the present loading quay (Export Quay) and the old quay in the curve of the river.<sup>10</sup> Three piers in 10 meters of water were under construction in the Outer Harbor. At the time of observation work was in progress on the middle of the three piers. 50X1-HUM

50X1-HUM

1. A Soviet naval vessel [REDACTED] was observed at point N 55-15, E 19-38 [REDACTED] The vessel circled a Danish vessel several times and then disappeared in a southeasterly direction. The forecâstle of the Soviet vessel apparently extended to the bridge house; bridge and one funnel were abaft the bridge house.

50X1-HUM

2. A Soviet naval vessel was observed on a southerly course at point N 55-30, E 19-50 [REDACTED] The vessel was difficult to identify because the observation was made from a distance of approximately three nautical miles and because of poor visibility due to weather conditions, but it was believed to be a RIGA-class destroyer escort.

3. It was learned from radio messages passing among other vessels in the vicinity at the time of the sighting in paragraph 2 above that there was great Soviet Fleet activity along the coast, close to the shore.

50X1-HUM

50X1-HUM

50X1-HUM

1. The following naval vessels were observed in Klaipeda [redacted]  
[redacted]
  - a. Three submarines were observed in the Winter Harbor [redacted]  
[redacted] The vessels [redacted]  
[redacted] have been observed there previously.
  - b. Three submarines [redacted]  
were observed in the Winter Harbor [redacted]  
[redacted]
  - c. Three small minesweepers were observed at the outer quay of the  
Winter Harbor [redacted] 50X1-HUM
  - d. Three identical submarines [redacted],  
were observed in the Winter Harbor [redacted]
  - e. The only other naval vessel observed [redacted] was a patrol  
boat which left the harbor from time to time. [redacted]  
[redacted]
2. Two vessels<sup>4</sup> were observed four nautical miles south of point  
N 55-32, E 20-05 at 1200 hours MET [redacted] The leading ves-  
sel, which was followed at a distance of approximately two nautical  
miles by a RIGA-class destroyer escort, was a destroyer with two  
funnels. According to radar, their course and speed was 202/21.
3. Three 80 to 100 millimeter guns with open shield and with barrels  
approximately four meters long were observed near the lighthouse

S-E-C-R-E-T

50X1-HUM

50X1-HUM

50X1-HUM

- 2 -

50X1-HUM

in Klaipeda [redacted] The guns were in a depression which apparently was lower than sea level. There were several low concrete structures near the guns. No service personnel were observed.

4. Three large cylindrical tanks measuring approximately 10 x 15 meters were observed floating high in the water in the moat at the Citadel [redacted] 50X1-HUM
5. A merchant vessel [redacted] was anchored outside the harbor [redacted] According to a Soviet pilot, the vessel's cargo was herring from the North Sea and Atlantic. 50X1-HUM
6. The merchant vessel KALUGA from Riga was at the Ballast Quay [redacted]
7. Only four crew members of a vessel at Klaipeda [redacted] were given permission to go ashore. Permission to go ashore was refused one man because on a previous visit he had returned too late to the ship.
8. There was no inspection of the vessel mentioned in paragraph 7 on its arrival in Klaipeda, but on departure three soldiers stood guard alongside the ship and ten men searched the ship. All closets and rooms large enough to conceal a man were searched, floor-plates in the engine room were lifted, and long iron bars were run through the cargo. 50X1-HUM
9. A ship's captain, its first mate and chief engineer went ashore in Klaipeda [redacted] without any special shore pass or time limit imposed. The rest of the crew was required to have a special shore pass and to return to the ship by midnight. If the time limit was not adhered to, the pass was withdrawn and the person was not allowed to go ashore again. In a few individual cases of non-adherence to the regulations, permission to go ashore also had been refused for future occasions. 50X1-HUM

SOURCE EVALUATIONS ARE DEFINITIVE. APPRAISAL OF CONTENT IS TENTATIVE. NOTE FOREGOING EXPLANATION.

50X1-HUM

1. The ex-MARTII-class fleet minelayer was towed out of Ventspils by two small icebreakers and a small tugboat on the afternoon [redacted]. The vessel had steam up for the winches only.

2. A vessel [redacted] and moored where the ex-MARTII-class minelayer had been.

3. The below-listed naval vessels were observed in Ventspils [redacted]

a. Nine KRONSHADT-class subchasers [redacted]

b. Eight small patrol boats or coastal minesweepers ashore [redacted]

c. An old trawler [redacted]

d. A vessel [redacted] which had a square stern and was somewhat shorter and had a higher freeboard than KRONSHADT-class subchasers. The vessel had a bridge house with radar on a girder mast and had no funnel but had a square exhaust in the side. It probably had two screws. Two canvas-covered objects were observed on the foredeck. Mine tracks or depth charge tracks and what was probably a winch were observed on the quarterdeck. No information was provided concerning armament.
